

Summary for Transcribe_audio_and_video_to_text_free_-_no_login_required_.mp4

Riverside just released a new tool where you could transcribe your podcast or video interviews 100% for free. Head over to [Riverside.fm slash transcription](https://Riverside.fm/transcription), drag and drop your video or audio file, and then let Riverside transcribe it for free. It also works in over 100 different languages. So let it do its transcription, and then you can copy and paste the text somewhere else, or you download it as a text file or a caption file. This is using Whisper, which is created by OpenAI, uses tons of AI data, hundreds of thousands of hours of analyzed audio, to get really accurate audio transcription, survey how to use 100% for free. Check it out.
